

Voltage Monitoring Relays

202-200-SP Series

Single-phase voltage monitor

Description

The 202-200-SP series voltage monitor is designed to protect single-phase motors regardless of their size. It can be used with 190–240 V ac, 50*/60 Hz motors to prevent damage caused by incoming power problems. A unique microcontroller-based, voltage-sensing circuit constantly monitors the voltage to detect harmful power line conditions. The MotorSaver® deactivates its output relay after a specified trip delay whenever harmful conditions are detected. The output relay reactivates after power line conditions return to an acceptable level and a specified amount of time has elapsed (restart delay). The trip delay prevents nuisance tripping due to rapidly fluctuating power line conditions.

*Note: 50 Hz will increase all delay timers by 20%.

Features & Benefits

FEATURES	BENEFITS
Proprietary microcontroller-based circuitry	Constant monitoring of voltage to detect harmful power line conditions, even before a motor starts
Fixed trip delay 4 s	Prevents nuisance tripping due to rapidly fluctuating power line conditions
Adjustable restart delay (manual, 2–3 s)	Allows staggered start-up of multiple motors after a fault to prevent a low-voltage condition
Advanced LED indication	Provides diagnostics that can be used for troubleshooting and to determine relay status
One screw mounting and standard 1/4" quick-connect terminals	Fast installation and compact size are perfect for panel assembly or OEM applications

Applications

- Fan motors
- Air conditioners
- Compressors
- Heat, well, and sump pumps
- Small conveyer motors

Voltage Monitoring Relays

202-200-SP Series

Specifications

Functional Characteristics

Line Voltage 190–240 V ac

Frequency 50*/60 Hz

Functional Characteristics

Low Voltage (% of setpoint)

Trip 90%

Reset 93%

High Voltage (% of setpoint) (not available on -NHV model)

Trip 110%

Reset 107%

Trip Delay Time

High and Low Voltage 4 seconds

Restart Delay Time

After a Fault or Complete Power Loss Manual, 2–300 seconds adjustable

Output Characteristics

Output Contact Rating (SPDT)

Pilot Duty 480 VA @ 240 V ac

General Purpose 10 A @ 240 V ac

General Characteristics

Temperature Range -40° to 70 °C (-40° to 158 °F)

Trip & Reset Accuracy ±1%

Repeatability ±0.5%

Input to Output Dielectric 1480 Vrms (min.)

Termination 0.25" male quick connect

Maximum Input Power 5 W

Relative Humidity 95%, non-condensing

Transient Protection IEC 61000-4-5, ±4 kV

Dimensions **H** 63.5 mm (2.5"); **W** 63.5 mm (2.5"); **D** 35.56 mm (1.4")

Weight 0.5 lb. (8 oz., 226.8 g)

Mounting Method 1/4" socket head cap screw (customer supplied)

*Note: 50 Hz will increase all delay timers by 20%.

Certification & Compliance

UL	UL508 (File #E68520)
